

Press Release

H. E. SERVICES BUCK THE DOWNWARD TREND

Most Plant Hire companies are feeling the pinch, big time, in the current economic climate with some companies closing down, most laying off substantial numbers of staff and selling off under used fleet items and instigating large scale depot closures. This is not the case however with H.E. SERVICES (Plant Hire) Ltd who have not closed any depots although there has been a slight reduction in their fleet of some 2,500 machines. In fact, H.E. SERVICES have just announced that their Cardiff Depot has moved to a much larger and better location together with better facilities, to provide an improved service for customers in South Wales and surrounding areas.

Chairman Hugh Edeleanu commented that: "We have been trading for the last 36 years and have seen many ups and downs, we are not in business for the short haul. Even though the industry continues to decline, our aim is to maintain our top quality service and extensive range of modern excavators for the benefit of our customers. Our new 2 acre Cardiff facility provides a much larger yard space for our fleet which covers South Wales, as well as providing improved office and workshop facilities."

Chris Clarke continues as the Depot Manager of the new Cardiff Depot facility for H.E. SERVICES, which is based in Caerphilly, not far from Junction 32 of the M4 Motorway which provides rapid access to South Wales, Bristol and the surrounding areas. The Depot used to be the main Depot in the area for Wimpey Plant and Transport in the 1990's.

H.E. SERVICES have 12 depots nationwide, which are able to offer excavators from 0.75 tonnes to 45 tonnes, Long Reach excavators and High Reach Demolition machines, telehandlers, JCB 3CX's, Dumpers and an extensive range of attachments, including Breakers, Shears, Pulverisers, Augers, Grapples, Brush Cutters, etc. all of which are available either Self Drive or Operated.

All H.E. SERVICES excavators are fitted with bucket ram guards, and the revolutionary Masterhitch quickhitch, saving valuable time on site. Currently running over 2000 items of plant, H.E. SERVICES is the largest excavator hire company in the UK, if not Europe.
